Datadog Announces Fourth Quarter and Fiscal Year 2023 Financial Results

February 13, 2024

Fourth quarter revenue grew 26% year-over-year to \$590 million

Strong growth of larger customers, with 396 \$1 million+ ARR customers, up from 317 a year ago

NEW YORK-- Datadog, Inc. (NASDAQ:DDOG), the monitoring and security platform for cloud applications, today announced financial results for its fourth quarter and fiscal year ended December 31, 2023.

"We are pleased with our strong execution in fiscal year 2023, with 27% year-over-year revenue growth, \$660 million in operating cash flow, and \$598 million in free cash flow," said Olivier Pomel, co-founder and CEO of Datadog. "During 2023, we delivered over 400 new features and capabilities to help our customers deliver on their cloud migration and digital transformation plans."

Pomel added, "Looking forward to 2024, we are excited about our plans to deliver more innovation and help our customers with their needs in modern Observability, Cloud Security, Software Delivery, and Cloud Service Management."

Fourth Quarter 2023 Financial Highlights:

- Revenue was \$589.6 million, an increase of 26% year-over-year.
- GAAP operating income was \$27.7 million; GAAP operating margin was 5%.
- Non-GAAP operating income was \$166.7 million; non-GAAP operating margin was 28%.
- GAAP net income per diluted share was \$0.15; non-GAAP net income per diluted share was \$0.44. Non-GAAP net income per diluted share is adjusted for an assumed provision for income taxes based on our long-term projected tax rate of 21%. ¹
- Operating cash flow was \$220.2 million, with free cash flow of \$201.3 million.

¹ The impact of this change was a reduction in non-GAAP net income per diluted share of \$0.11 and \$0.32 per diluted share, for the fourth quarter and fiscal year ended December 31, 2023, respectively. Our non-GAAP net income per diluted share guidance for the fourth quarter 2023 and full year 2023 issued on November 7, 2023 did not reflect an adjustment for an assumed provision for income taxes.

- Cash, cash equivalents, restricted cash, and marketable securities were \$2.6 billion as of December 31, 2023.

Fiscal Year 2023 Financial Highlights:

- Revenue was \$2.13 billion, an increase of 27% year-over-year.
- GAAP operating loss was \$(33.5) million; GAAP operating margin was (2)%.
- Non-GAAP operating income was \$490.2 million; non-GAAP operating margin was 23%.
- GAAP net income per diluted share was \$0.14; non-GAAP net income per diluted share was \$1.32. Non-GAAP net income per diluted share is adjusted for an assumed provision for income taxes based on our long-term projected tax rate of 21%.¹
- Operating cash flow was \$660.0 million, with free cash flow of \$597.5 million.

Fourth Quarter & Recent Business Highlights:

- As of December 31, 2023, we had 396 customers with ARR of \$1 million or more, an increase of 25% from 317 as of December 31, 2022. As of December 31, 2023, we had about 3,190 customers with ARR of \$100,000 or more, an increase of 15% from 2,780 as of December 31, 2022.
- Announced that Sara Varni is joining as Chief Marketing Officer. Varni brings more than 15 years of marketing experience centered around enterprise software products, including leadership positions at Attentive, Twilio and Salesforce.
- Added identity, vulnerability and app-level findings to Security Inbox. This provides engineers with one actionable view to improve security posture, without any additional overhead or friction. With these new features, Datadog shifts cloud security earlier in the software development lifecycle and empowers developers and security teams to address issues proactively.
- Expanded security and observability support for AWS serverless applications built on AWS Lambda and Step Functions services. The functionality announced at AWS re:Invent helps AWS Lambda and Step Functions users detect security threats, get a high-level overview of how their state machine is performing at a single point in time and monitor services instrumented with OpenTelemetry.
- Released our *The State of Cloud Security 2023* report. Datadog analyzed security posture data from thousands of organizations using AWS, Azure or Google Cloud for the report, focusing particularly on understanding how organizations approach and mitigate common risks that frequently lead to documented public cloud security incidents.
- Announced an expanded strategic partnership with Google Cloud, which enables Google Cloud customers to proactively observe and secure their cloud-native and hybrid applications within Datadog's

unified platform. As part of the expanded partnership and integrations, Datadog is one of the first AI/ML observability solution partners for Vertex AI, allowing AI Ops teams and developers to monitor, analyze and optimize the performance of their machine learning models in production.

First Quarter and Fiscal Year 2024 Outlook:

Based on information as of today, February 13, 2024, Datadog is providing the following guidance:

- **First Quarter 2024 Outlook:**
 - Revenue between \$587 million and \$591 million.
 - Non-GAAP operating income between \$128 million and \$132 million.
 - Non-GAAP net income per share between \$0.33 and \$0.35, assuming approximately 357 million weighted average diluted shares outstanding.
- **Fiscal Year 2024 Outlook:**
 - Revenue between \$2.555 billion and \$2.575 billion.
 - Non-GAAP operating income between \$535 million and \$555 million.
 - Non-GAAP net income per share between \$1.38 and \$1.44, assuming approximately 361 million weighted average diluted shares outstanding.

The outlook for non-GAAP net income per diluted share is adjusted for an assumed provision for income taxes based on our long-term projected tax rate of 21%. Our presentation of non-GAAP net income, including non-GAAP net income guidance, in future periods will reflect an adjustment for an assumed provision for income taxes, as appropriate.

Datadog has not reconciled its expectations as to non-GAAP operating income, or as to non-GAAP net income per share, to their most directly comparable GAAP measure as a result of uncertainty regarding, and the potential variability of, reconciling items such as stock-based compensation and employer payroll taxes on equity incentive plans. Accordingly, reconciliation is not available without unreasonable effort, although it is important to note that these factors could be material to Datadog's results computed in accordance with GAAP.

Conference Call Details:

- **What:** Datadog financial results for the fourth quarter and fiscal year 2023 and outlook for the first quarter and the fiscal year 2024
- **When:** February 13, 2024 at 8:00 A.M. Eastern Time (5:00 A.M. Pacific Time)

- **Dial in:** To access the call in the U.S., please register [here](#). Callers are encouraged to dial into the call 10 to 15 minutes prior to the start to prevent any delay in joining.
- **Webcast:** <https://investors.datadoghq.com> (live and replay)
- **Replay:** A replay of the call will be archived on the investor relations website

We announced an Investor Day on Thursday, February 15 in New York City starting at 1:00 p.m. ET.

Event Details:

- **What:** Datadog 2024 Investor Day
- **When:** February 15, 2024 at 1:00 P.M. to 5:00 P.M. Eastern Time
- **In-person attendance:** Please contact our team at IR@datadoghq.com for more information.
- **Webcast:** <https://investors.datadoghq.com> (live and replay)
- **Replay:** A replay of the event will be archived on the investor relations website

About Datadog

Datadog is the observability and security platform for cloud applications. Our SaaS platform integrates and automates infrastructure monitoring, application performance monitoring, log management, user experience monitoring, cloud security and many other capabilities to provide unified, real-time observability and security for our customers' entire technology stack.

Datadog is used by organizations of all sizes and across a wide range of industries to enable digital transformation and cloud migration, drive collaboration among development, operations, security and business teams, accelerate time to market for applications, reduce time to problem resolution, secure applications and infrastructure, understand user behavior and track key business metrics.

Forward-Looking Statements

This press release and the earnings call referencing this press release contain "forward-looking" statements, as that term is defined under the federal securities laws, including but not limited to statements regarding Datadog's strategy, product and platform capabilities, the growth in and ability to capitalize on long-term market opportunities including the pace and scope of cloud migration and digital transformation, gross margins and operating margins including with respect to sales and marketing, research and development expenses, net interest and other income, investments and capital expenditures, and Datadog's future financial performance, including its outlook for the first quarter and fiscal year 2024 and related notes and assumptions. These forward-looking statements are based on Datadog's current assumptions, expectations and beliefs and are subject to substantial risks, uncertainties, assumptions and changes in circumstances that may cause

Datadog's actual results, performance or achievements to differ materially from those expressed or implied in any forward-looking statement.

The risks and uncertainties referred to above include, but are not limited to (1) our recent rapid growth may not be indicative of our future growth; (2) our history of operating losses; (3) our limited operating history; (4) our dependence on existing customers purchasing additional subscriptions and products from us and renewing their subscriptions; (5) our ability to attract new customers; (6) our ability to effectively develop and expand our sales and marketing capabilities; (7) risk of a security breach; (8) risk of interruptions or performance problems associated with our products and platform capabilities; (9) our ability to adapt and respond to rapidly changing technology or customer needs; (10) the competitive markets in which we participate; (11) risks associated with successfully managing our growth; and (12) general market, political, economic, and business conditions including concerns about reduced economic growth and associated decreases in information technology spending. These risks and uncertainties are more fully described in our filings with the Securities and Exchange Commission (SEC), including in the section entitled "Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2023, filed with the SEC on November 7, 2023. Additional information will be made available in our Annual Report on Form 10-K for the year ended December 31, 2023 and other filings and reports that we may file from time to time with the SEC. Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, we cannot guarantee future results, levels of activity, performance, achievements, or events and circumstances reflected in the forward-looking statements will occur. Forward-looking statements represent our beliefs and assumptions only as of the date of this press release. We disclaim any obligation to update forward-looking statements.

About Non-GAAP Financial Measures

Datadog discloses the following non-GAAP financial measures in this release and the earnings call referencing this press release: non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses (research and development, sales and marketing and general and administrative), non-GAAP operating income (loss), non-GAAP operating margin, non-GAAP net income (loss), non-GAAP net income (loss) per diluted share, non-GAAP net income (loss) per basic share, free cash flow and free cash flow margin. Datadog uses each of these non-GAAP financial measures internally to understand and compare operating results across accounting periods, for internal budgeting and forecasting purposes, for short- and long-term operating plans, and to evaluate Datadog's financial performance. Datadog believes they are useful to investors, as a supplement to GAAP measures, in evaluating its operational performance, as further discussed below. Datadog's non-GAAP financial measures may not provide information that is directly comparable to that provided by other companies in its industry, as other companies in its industry may calculate non-GAAP financial results differently,

particularly related to non-recurring and unusual items. In addition, there are limitations in using non-GAAP financial measures because the non-GAAP financial measures are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies and exclude expenses that may have a material impact on Datadog's reported financial results.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. A reconciliation of the historical non-GAAP financial measures to their most directly comparable GAAP measures has been provided in the financial statement tables included below in this press release.

Datadog defines non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses (research and development, sales and marketing and general and administrative), non-GAAP operating income (loss), non-GAAP operating margin and non-GAAP net income (loss) as the respective GAAP balances, adjusted for, as applicable: (1) stock-based compensation expense; (2) the amortization of acquired intangibles; (3) employer payroll taxes on employee stock transactions; (4) amortization of issuance costs; and (5) an assumed provision for income taxes based on our long-term projected tax rate. Our estimated long-term projected tax rate is subject to change for a variety of reasons, including the rapidly evolving global tax environment, significant changes in Datadog's geographic earnings mix, or other changes to our strategy or business operations. We will re-evaluate our long-term projected tax rate as appropriate. Datadog defines free cash flow as net cash provided by operating activities, minus capital expenditures and minus capitalized software development costs, if any. Investors are encouraged to review the reconciliation of these historical non-GAAP financial measures to their most directly comparable GAAP financial measures.

Management believes these non-GAAP financial measures are useful to investors and others in assessing Datadog's operating performance due to the following factors:

Stock-based compensation. Datadog utilizes stock-based compensation to attract and retain employees. It is principally aimed at aligning their interests with those of its stockholders and at long-term retention, rather than to address operational performance for any particular period. As a result, stock-based compensation expenses vary for reasons that are generally unrelated to financial and operational performance in any particular period.

Amortization of acquired intangibles. Datadog views amortization of acquired intangible assets as items arising from pre-acquisition activities determined at the time of an acquisition. While these intangible assets are evaluated for impairment regularly, amortization of the cost of acquired intangibles is an expense that is not typically affected by operations during any particular period.

Employer payroll taxes on employee stock transactions. Datadog excludes employer payroll tax expense on equity incentive plans as these expenses are tied to the exercise or vesting of underlying equity awards and the price of Datadog's common stock at the time of vesting or exercise. As a result, these taxes may vary in any particular period independent of the financial and operating performance of Datadog's business.

Amortization of issuance costs. In June 2020, Datadog issued \$747.5 million of convertible senior notes due 2025, which bear interest at an annual fixed rate of 0.125%. Debt issuance costs, which reduce the carrying value of the convertible debt instrument, are amortized as interest expense over the term. The expense for the amortization of debt issuance costs is a non-cash item, and we believe the exclusion of this interest expense will provide for a more useful comparison of our operational performance in different periods.

Additionally, Datadog's management believes that the non-GAAP financial measure free cash flow is meaningful to investors because it is a measure of liquidity that provides useful information in understanding and evaluating the strength of our liquidity and future ability to generate cash that can be used for strategic opportunities or investing in our business. Free cash flow represents net cash provided by operating activities, reduced by capital expenditures and capitalized software development costs, if any. The reduction of capital expenditures and amounts capitalized for software development facilitates comparisons of Datadog's liquidity on a period-to-period basis and excludes items that management does not consider to be indicative of our liquidity.

Operating Metrics

Datadog's number of customers with ARR of \$100,000 or more and number of customers with ARR of \$1 million or more are based on the ARR of each customer, as of the last month of the quarter.

We define the number of customers as the number of accounts with a unique account identifier for which we have an active subscription in the period indicated. Users of our free trials or tier are not included in our customer count. A single organization with multiple divisions, segments or subsidiaries is generally counted as a single customer. However, in some cases where they have separate billing terms, we may count separate divisions, segments or subsidiaries as multiple customers.

We define ARR as the annualized revenue run-rate of subscription agreements from all customers at a point in time. We calculate ARR by taking the monthly recurring revenue, or MRR, and multiplying it by 12. MRR for each month is calculated by aggregating, for all customers during that month, monthly revenue from committed contractual amounts, additional usage, usage from subscriptions for a committed contractual amount of usage that is delivered as used, and monthly subscriptions. ARR and MRR should be viewed independently of revenue, and do not represent our revenue under GAAP on a monthly or annualized basis, as they are operating metrics that can be impacted by contract start and end dates and renewal rates. ARR and MRR are not intended to be replacements or forecasts of revenue.
